

Why choose OQUALIM ?

1. Reference and unifying figure :

OQUALIM pools expertise, analyses, and identifies future needs. OQUALIM ensures the robustness and reliability of feed safety, quality, and traceability procedures for certified animal nutrition companies.

2. Rigorous and Impartial :

OQUALIM certification is granted by independent organisations. The shared self-monitoring plans, built on a risk analysis updated annually, provide high-quality surveillance data that serves the entire industry.

3. Adaptive and Responsive :

The shared self-monitoring plans ensure appropriate and representative sanitary monitoring, complemented by voluntary data submissions outside the plan. This OQUALIM system enhances collective responsiveness in the event of an alert.

4. Proven and recognized :

A turnkey certification, the result of over 20 years of expertise in the various standards managed by the association, starting from the first third-party certification Qualimat Transport. Mutual recognition of OQUALIM certification schemes with European frameworks (GMP+ International, OVOCOM, QS, and AIC).

Planning to anticipate alerts

Monitor feed safety and quality

Certify animal nutrition plants

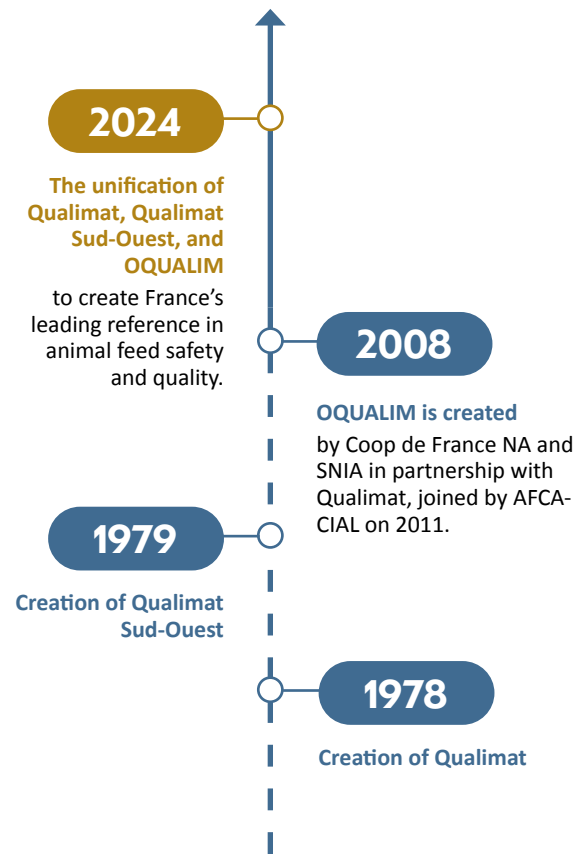

By your side for over 40 years

At the end of 2024, OQUALIM entered a new chapter by merging with Qualimat and Qualimat Sud-Ouest. The association forms a unique entity dedicated to the animal feed sector, with strong regional roots, national organization, and international connections.

Designed by and for its stakeholders, this union strengthens French excellence in nutritional quality and feed safety, while preparing for the future through innovation and resource pooling.

Pascal LE PAIH, president of OQUALIM.

Committed to nutritional quality and feed safety

Certification

- OQUALIM has developed certifications for manufacturers and distributors of animal feed and premixes, as well as for suppliers (manufacturers, distributors, traders) of raw materials intended for feed and premix producers.
- QUALIMAT TRANSPORT certifies the sanitary quality of products during road transport.

Monitoring

- OQUALIM monitors the nutritional quality of raw materials.
- OQUALIM identify and control the contaminants that may be present in the inputs used by feed and premix manufacturers.
- A monitoring system helps identify emerging risks, define standards and ensure the relevant evolution of activities.

Alert management

OQUALIM's alert unit ensures effective monitoring and, in the event of an unsatisfactory result, mobilizes experts and stakeholders to verify information and ensure a high level of responsiveness.

Key figures

85 000

samples analyzed since the creation of the various pooled plans.

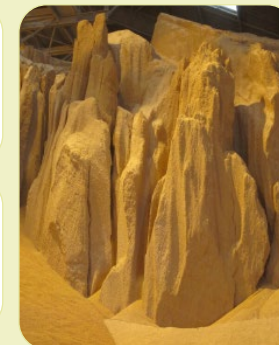

+2M de tonnes of imported raw materials are inspected each year.

95%

of french production is certified for compound feed manufacturing.

62

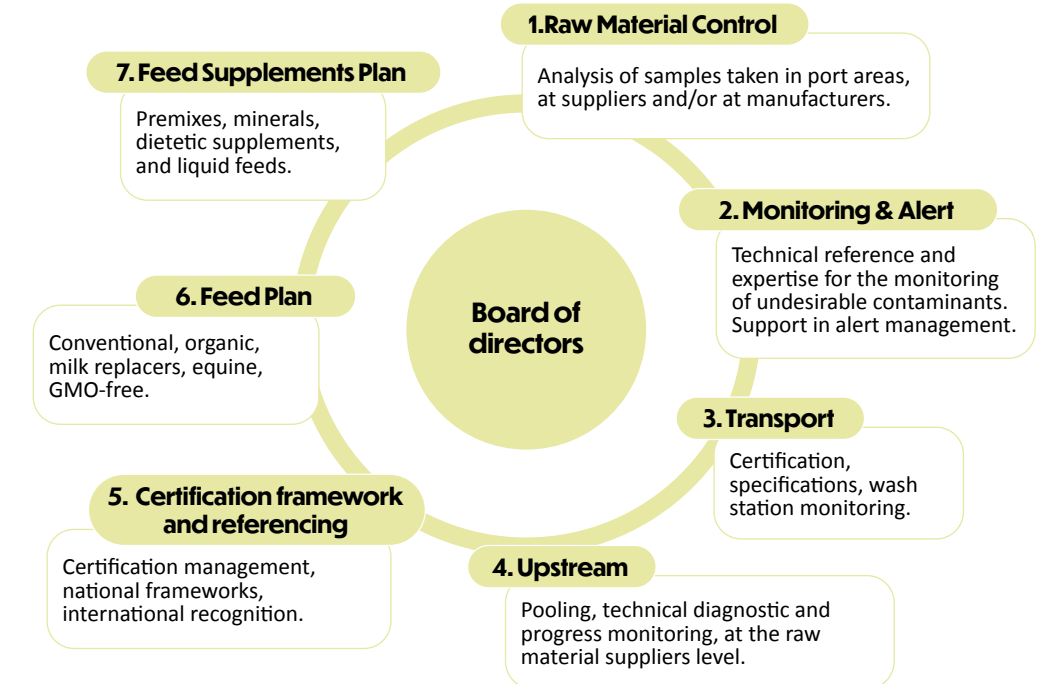

alert cells coordinated between 2012 and 2024.

Our 7 Committees

The committees work to improve the nutritional and sanitary quality of feed intended for livestock, in accordance with the Good Hygiene Practices Guide for animal nutrition. Their management aims to tailor actions as closely as possible to the needs of partners.

They provide spaces for dialogue and the sharing of expertise between OQUALIM's permanent teams and committed partners. Through their work, the committees strive to balance a strong local presence, national impact, and, where relevant, international outreach.
